

## ALIFANT

### For Beginners

Our Alifant slide is a simple and safe model offering sliding fun for even the smallest children.

Sliding experts are made, not born, so practice makes perfect!

## OTILIE

### For Experienced Sliders

Our Otilie offers colorful sliding fun. The figure gracefully winds itself around a tree trunk, allowing children to slide down its back into the pool at the bottom.

Badi Entfelden, Oberentfelden, Switzerland

Our Otilie can be produced in a variety of colors for you to choose from.

## TRIPLE SLIDE

### For Young Pros

The Triple Slide offers a special sliding experience that kids just cannot get enough of. Each child sets their own pace with three lanes for a variety of sliding options.

Sporthotel Achensee, Achenkirch, Austria

Freibad Edesheim, Edenkoben, Germany

Acquaworld, Concorezzo, Italy

## SAFETY

### Safety First

Water slides are a type of sports equipment that must be built and operated so that the possibility of injury or other damage to personal health is eliminated when the equipment is used properly. Legal norms as defined in regulation EN 1069 parts 1 and 2 define safety requirements for the planning, construction and operation of water slides as well as presenting regulations for their documentation and safety certification.

The safety of our guests is our highest priority. We offer a wide variety of instructional materials and safety systems to ensure the secure operation of the water slide. Our safety systems have been developed to operate under extreme conditions.

## SECURITY CERTIFICATION

### Tested and Approved

Before a water slide can be operated, it is thoroughly tested and approved by the TÜV Technical Inspection Association according to legal norms and safety requirements. The certification report and the operational instructions prepared by Klarer Freizeitanlagen AG contain all important information for a secure operation of the water slide.

## INSTRUCTIONS

### Rules of Use

Basic instructions are a standard requirement for every water slide and contain important safety information as well as rules of conduct for users. Our safety systems encourage guests to follow these rules.

## START LIGHTS

### Time-Interval or Sensor-Activated

The lights control the slide frequency of guests. A time-interval light system signals green on a pre-set timer, the sensor-activated light system opens the water slide when the guest has passed the pre-set point along the water slide route. This lighting system can be built into the initial slide segment or installed as an add-on system.

## TURNSTILE ENTRY

### Providing the Highest Security Standards

The turnstile stops unwanted entry to the starting area and meets safety requirements for high-speed water slides. The turnstile is opened only once the guest has left the landing pool through a second turnstile.

## CCTV SYSTEMS

### Ensuring Safety

This video system with real-time images allows monitoring of the start and/or landing areas. The system allows visualization and preservation of evidence in cases of illegal or improper use of a particular water slide. CCTV systems help to identify potentially dangerous situations and reconstruct the sequence of events in case of an accident.

## What we can do for you

### Are you interested in installing a new water slide?

Whether you are a first-time user or an experienced expert, if you are looking for a simple children's slide or planning a complete waterpark - we are here to guide you through the process. We know the market, recognize the latest trends and have the necessary expertise and experience to make your project a success.

## Concept and Planning

### Give us a call. We are here to help you!

Share your vision with us. We use your basic planning documents to create a three-dimensional drawing of your idea and can provide either a general estimate or more detailed offer. Thanks to modern CAD technology, you have a realistic idea of how the new water slide will look and fit into your leisure park from the earliest stages of the planning process.

We are also happy to visit you on-site to discuss your plans. Just contact us to set up an appointment. We not only build water slides, we provide you with complete service from beginning to end, including thorough product explanation and concept development with careful planning and cost control. (See page six for an example of a client concept with three possible expansion stages.)

Since the very beginning of our company, our goal has been to pass on our own joy and enthusiasm for water slides to our clients and their waterpark guests

system klarer

## Our Company

Klarer Freizeitanlagen AG is a traditional family business with headquarters in Hallau, in northern Switzerland. Surrounded by vineyards in the Klettgau Region, we have designed and produced water slides and water amusements for clients from around the world for more than thirty years. Armin Klarer, company founder, has now handed over the reins to his two children, Claudia and Stefan. A young, dynamic team of motivated experts will support you from the initial consultation until installation is complete. In addition to our home team, our many agents located throughout Europe are also ready to help.

## Our Promise of Quality

Quality and value retention are important decision criteria for our clients in Europe. To meet this need, we maintain high quality standards and invest the necessary time in careful planning to ensure that your water slides continue to attract customers for many years to come. The knowledge and experience of more than three decades flows into the planning of your project. Regardless of space limitations, we create a cost-effective concept tailored to your target audience.
