KORTRIJK BELGIUM

Water slides from Klarer serve as the main attraction for a new water park in Belgium.

The heretofore largest sports & water park from the well-known LAGO Group is coming into being in Kortrijk, Belgium. Our teams are installing the first water slides at a dizzying height. The opening of the spectacular water park is planned for the spring of 2019.

An eventful year lies behind us. The development of the world's first water slide with wind propulsion and the realization of a prototype at AquaMagis in Plettenberg were exciting topics which we devoted ourselves to. One of the most spectacular water slides in recent years came into being with the Stormchaser. But that's not all: In Project 5.0, two other slides were realized for AquaMagis, and therefore the largest expansion since the opening of the water park was successfully implemented.

But much has also happened beyond the German-speaking borders. In Kortrijk we were able to realize one of the largest slide complexes in Belgium. A total of five water slides will be implemented in the latest LAGO facility, including the Magic Twice double slide, the Abyss funnel slide and a Magic Tube with Infinity-Jump and Fake Slide elements. We are not only able to enjoy an increased interest in our water slides in Europe. The demand for unique slide types is also increasing in China and the USA. For instance, we were able to successfully complete the first two projects in Houston, Texas and St. Charles, Illinois in the United States, and we are pleased about the first order for a large-scale slide complex in China.

The continuous new development and further development of water slides will also be an important corporate objective for us in the future. Innovative slide types and individual planning are our most important factors for the sustainable success of a slide complex. Get an idea of our concepts and send us a non-binding inquiry!

WATER MEETS WIND STORMCHASER

The new development of the world's first wind-powered water slide has attracted a lot of attention. Even the prototype of the Stormchaser, which could be admired and tested at our headquarters in Hallau, allowed reason to expect a promising future for the initial realization.

4

On June 30, 2018 the time had come and the world's first wind-powered slide could be put into operation at AquaMagis in Plettenberg.

Wind speeds of up to 100 km/h are generated by means of an axial fan in a closed tube slide. The visitor is only propelled by wind power, regardless of slope or gradient. The intensity of the wind can be selected from three different programs, and can be additionally accelerated or decelerated on special rafts.

**AQUAMAGIS PLETTENBERG
PROJECT 5.0**

THE TRENDSETTER AMONG THE WATER PARKS HAS EXPANDED. TWO SLIDES WERE REPLACED AND A WORLD DEBUT WAS REALIZED IN PROJECT 5.0 AT AQUAMAGIS IN PLETTENBERG.

SLIDING TOGETHER RACER SLIDE

The fun of sliding together is not encouraged more on any water slide than on the Racer Slide. Three adjacent lanes provide the greatest possible safety and a capacity which also means there will be no long waiting times on very busy days. The Racer Slide can be offered in open or closed version as well as in all conceivable alignments. The sliding experience can be arranged in an even more impressive fashion by additional features such as time measurement, impressive effects as well as elaborate themes.

RACE SLIDING MAGIC TWICE

The Alpamare in Pfäffikon (SZ) on beautiful Lake Zurich is the best-known water park in Switzerland and now boasts another spectacular attraction. The Jungle Run is the longest double slide in Europe, with an overall length of 440 meters divided over two lanes. The Magic Twice is the classic racing slide from Klarer. Who will win the race and cross the finish line with the best time? Time measurement and special effects for the sensation of acceleration make competition seem even more exciting!

FAKE SLIDE AND INFINITY-JUMP SLIDING WITH A UNIQUE FEATURE

Who wants a normal water slide? An interesting water slide remains engraved in your memory. In addition to the type of slide, it is the attractions and effects which leave a lasting impression. Offer your guests more with Fake Slide, Infinity-Jump and a variety of configurations.

Attractions and effects are becoming increasingly more important features to offer visitors a special experience. Attractions such as Fake Slide and Infinity-Jump support the sliding experience in an impressive number of ways.

Fake Slide elements provide the guest with an optical illusion that feigns the straight run of the slide, although the actual alignment runs as a curve.

The Infinity-Jump is provided with a built-in jump that feigns the continuation of the tube slide under the same gradient. Both attractions offer a variety of different configurations for an individual slide.

**FUN, ACTION, SPECIALS
ARE YOU LOOKING
FOR SOMETHING
SPECIAL?
WE HAVE IT!**

Only those who stand out from the competition will be rewarded with attention. Unique features are among the most important qualities to gain the favor of customers. This is precisely why with us there is no year without specials which we naturally do not want to withhold from you.

FREESTYLE STAND-UP SLIDE

What is forbidden on all other water slides can finally be lived out!

CRAZY-JUMP

Even the start takes effort. Do you dare?

SUMMERSLIDE

The world's largest mobile water slide.
