RENOVATION OUTDOOR POOL IN KLOTEN

During the renovation of the outdoor pool in Kloten (Switzerland), the idea of a unique construction, the Rocket Tower, triumphed. The new attraction includes two children's slides and a combined tube slide and water slide over 100 m long with lots of special effects.

Klarer Freizeitanlagen AG is considered to be a pioneer within the industry for the development and thematization of water slides for a reason. This year, the first two standing slides in the world were opened in AquaMagis in Plettenberg. Media interest was huge and the first guests were visibly excited. The Green Viper, the first elaborately thematic adventure slide with its many attractions and effects, opened in Europabad in Karlsruhe. Another feature: The Green Viper was created in close collaboration with water slide fans, who were able to make decisions about the features of the slide themselves.

In recent years, we have invested a lot of time and energy into the development of new attractions. This is the only way to develop unique water slides like the Thunderbird in H₂O in Herford with Infinity Jump and impressive LED video technology. We will also continue to set the bar for innovative concepts and look forward to many new and exciting projects.

THE FIRST STANDING SLIDE IN THE WORLD FREESTYLE

THE THING WHICH IS FORBIDDEN ON ALL OTHER
WATER SLIDES CAN NOW FINALLY BE DONE:
SLIDING WHILE STANDING!

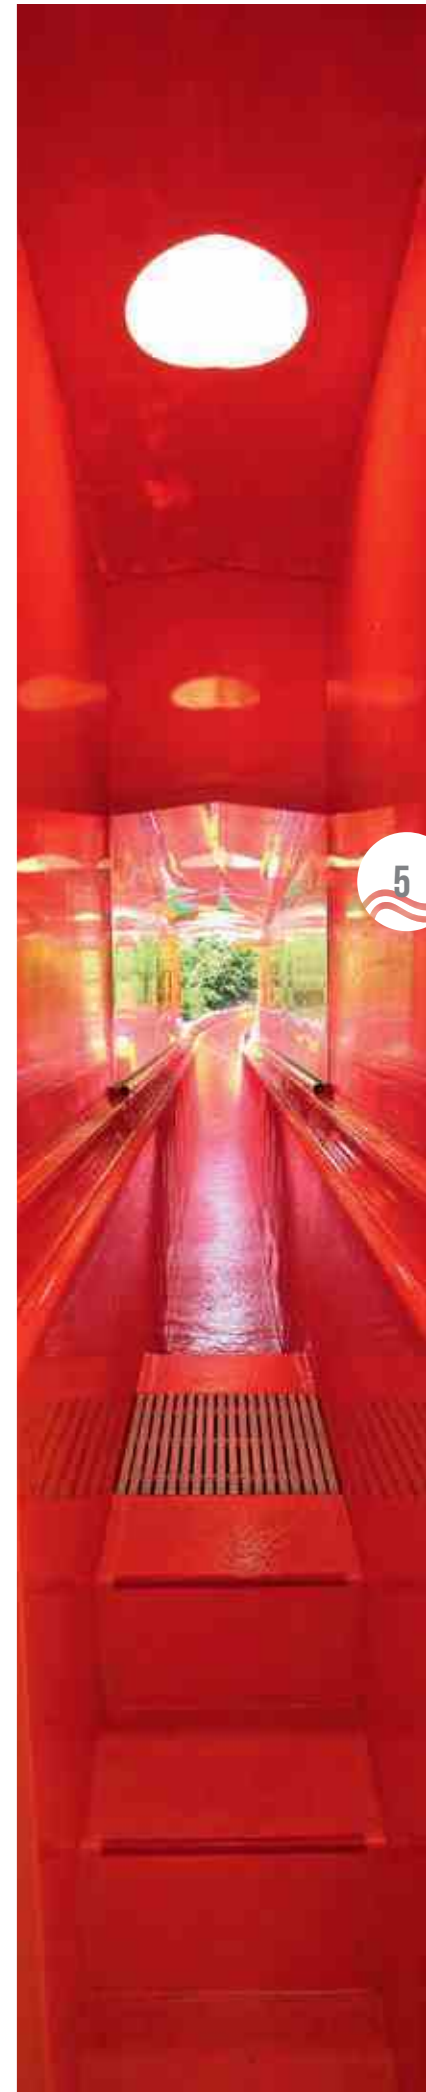

Many doubted its feasibility, but here she is, the first standing slide in the world. Known as a pioneer for the realization of innovative slide concepts, AquaMagis in Plettenberg was quickly convinced of the crazy idea. Now two new standing slides have been added this summer, expanding the range of slides at the water park in Nordrhein-Westfalen.

You can learn how surfing works on the 30m long SauerlandSURFER in subdued green. On the 100m long, bright orange CrazySURFER, experienced slide-goers go to dizzying heights through fast curves and steep passages. While the beginner's slide is located inside, the standing slide for advanced sliders is outside in the open through the middle of the water park.

Do you dare?

THE MOST VENOMOUS SNAKE IN GERMANY
GREEN VIPER

BY SLIDE FANS FOR SLIDE FANS – THE ELABORATELY
THEMATIC ADVENTURE SLIDE WAS FORMED IN
KEEPING WITH THIS MOTTO. THE GREEN VIPER WAS
BROUGHT TO LIFE IN COLLABORATION WITH THE
BIGGEST COMMUNITY OF SLIDE FANS.

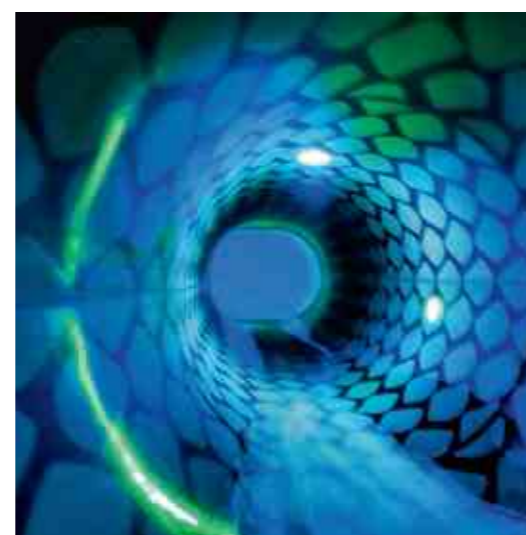

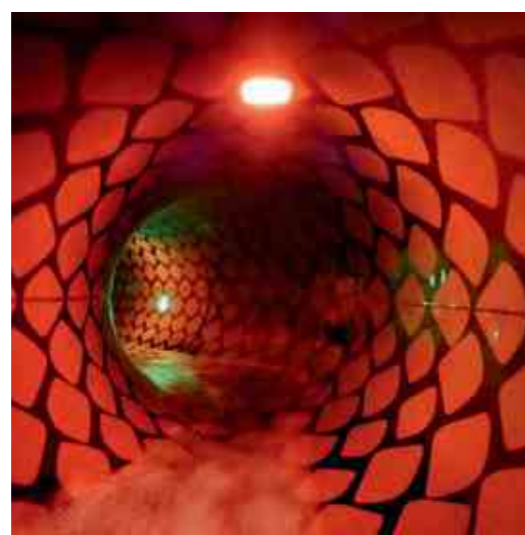

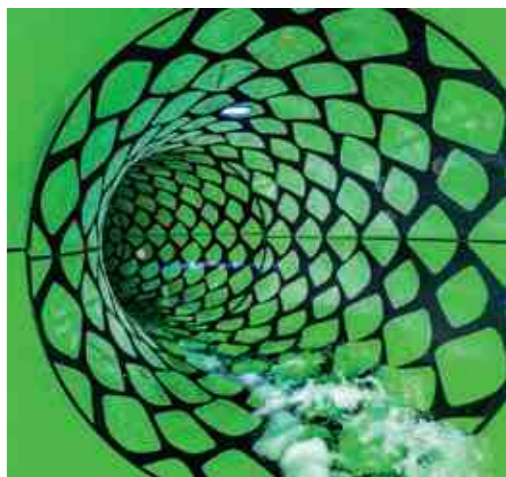

GREEN VIPER

Over a period of several weeks, the community of slide fans was able to discuss, vote on and finally co-decide the variety of features.

Now it is ready, the new high-tech slide with its many special effects was opened in Europabad in Karlsruhe. With venom-green eyes, a wide open mouth and a distinct soundtrack, the Green Viper awaits its fearless visitors. Thrilling light effects, an impressive cone with its snake's head and waterfall, the unique Europabad jump with PhotoPoint, sensational sound effects and interactive elements make the Green Viper a special kind of slide adventure.

KLARER'S THUNDERBIRD

THE SPECIALIST PRESS IS IN AGREEMENT AND DESCRIBES THE THUNDERBIRD AS A «SENSATION», «ABSOLUTELY MIND-BLOWING» AND «A NEW GENERATION OF SLIDES».

What has long been known in amusement parks as the Dark Ride has for the first time been turned into a water slide with the Thunderbird in H₂O in Herford. On the Thunderbird, thrill-seekers can embark on a turbulent journey by air and under water. The travel route is decided at the starting point: with Space, Blizzard and Deep Sea, there are three scenarios to choose from, all guaranteeing a slide adventure never seen before. This is made possible by a high-tech tube slide equipped with LED video technology which is unmatched across the world. The Infinity Jump ensures a special thrill which keeps the bathers in suspense via an optical illusion. Spectacular sound effects, breath-taking video sequences and gripping adventures await fearless bathers in the Thunderbird.

TO INFINITY... AND BEYOND! INFINITY JUMP

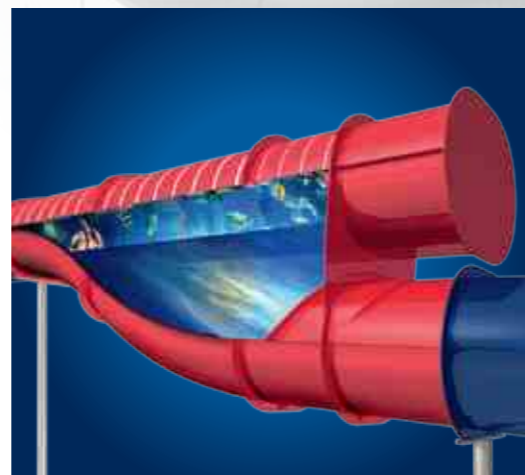

The Infinity Jump is an additional attraction for tube slides which is equipped with a built-in jump, i. e. a section with a steep slope. The user is led to believe that the tube slide continues on the same slope. The optical illusion is added to the upper edge of the element and displays a straight progression of the tube slide. However, the actual route runs underneath the optical illusion and thereby creates an unexpected surprise effect.

NOTHING'S AS IT SEEMS FAKE SLIDE

The Fake Slide is a slide component which convinces the bather that the slide is going straight forward when it is actually moving in a curve. The Fake Slide is used like a normal curve component while a Perspex pane reveals the slide's straight path. Alongside the effect of the optical illusion, various additional effects can be built into the fake component.

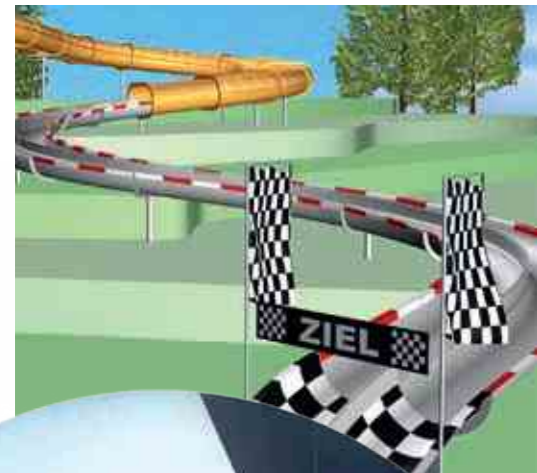

NEW DEVELOPMENTS MAGIC TWICE

Magic Twice is the latest racer from the house of Klarer. We have developed Magic Twice in order to meet the desire for a two-lane race slide. As the only race slide on the market, Magic Twice enables direct eye contact with the opponent. The partition between the two lanes is transparent, making safe and at the same time thrilling contests possible.

Face-to-face on Magic Twice – coming soon to the leisure centre Hains in Freital.

NEW DEVELOPMENTS STORMCHASER

Another new development is the Stormchaser. The first wind slide in the world can be used as a tire and mat slide. Streams of air with airspeeds of up to 80 km/h are produced at different points in the tube slide via axial fans. The Stormchaser is designed in such a way that the bather is driven forward purely by wind power and independently from the slope.

Be a Stormchaser – coming soon to Klarer!
