Abyss® - the new safety abyss

For the new giant project "Therme Erding", a new safety concept for the already well-known funnel slide - **Space Bowl** – was developed by the company Klarer.

The user is dragged down through a gigantic abyss, perfectly safely and controlled.

Firstly, the large drum only serves as a centre, which is equipped with a high-speed turbo slide and leads into a 30-metre long outflow zone via the innovative safety concept. With this development, a simple connection to all-year bathing is possible. Start in the building and land with maximum safety.

Flying and landing like an eagle with the High – Fly water jump

The first water jump slide was realised 3 years ago and since then it has been continuously redeveloped.

The result of this work can be examined, and of course tested, in the "Fildorado in Filderstadt/Germany".

Improved in jump height and width, this product is a public magnet for sliders and spectators.

Width measurements allow a comparison of jumping distances up to the critical K point.

Flying and landing like an eagle; man's dream is here fulfilled for a short time.

Magic Eye®

A special kind of UFO.
Oversized dimensions.
The **2.5m wide magical ellipse** has developed into an absolute hit.

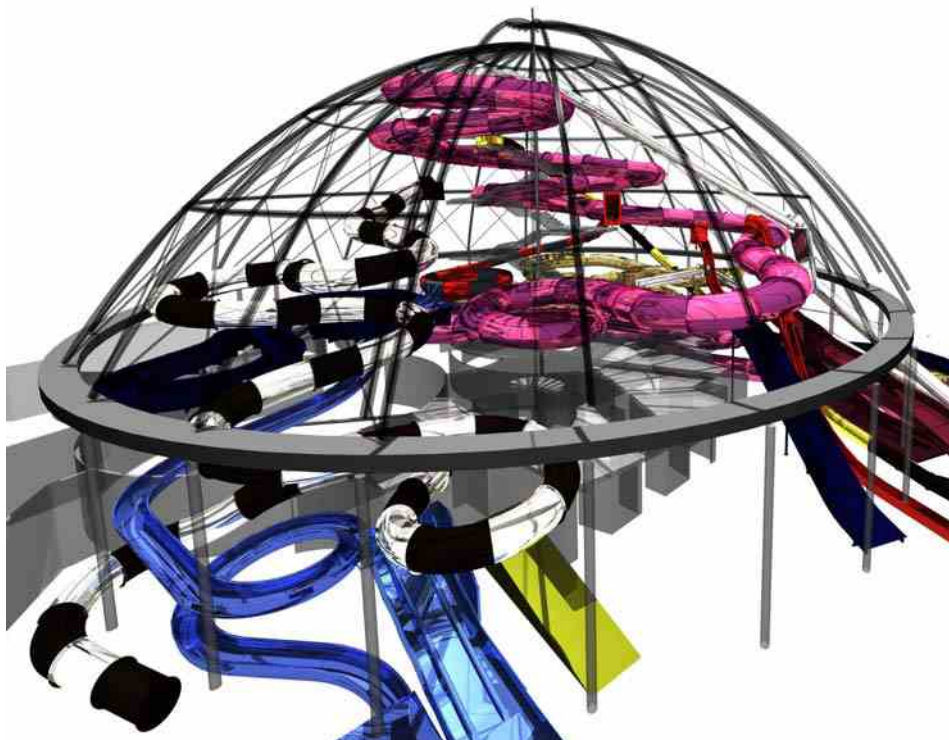

NEW
The Magic Eye available with outer cover, sound and heat insulation.

Individually, in twos or brand new with a 3-seater tyre, the possibilities are endless.

Therme Erding – project of the superlative

A project of the superlative has been developed within a few months!

Klarer Freizeitanlagen AG has supplied the

- **Magic Eye® with a length of 300m** and as a result is the longest indoor slide in Europe, **as well as**
- a 66m long **turbo slide**,
- a 133m long **Black Hole**,
- an **Abyss® funnel slide**,
- a 170m long **wild water river**,
- a **High Fly jump slide**
- and a **Triple Slide**.

This project has been developed in conjunction with the company Wiegand, which also supplied 5 other slides.

Water playground

All kinds of water playgrounds. Any combination can be installed at any swimming pool.

New at Klarer:
Interactive play
elements incl. pools
with soft padding.
Ask for more
information.

Triple Slide - the family slide

The Triple Slide from Klarer offers a lot for the whole family. A leisurely slide for mum, dad and the kids on the middle slide, kamikaze slide on the right and the „free fall“ on the left!
The good value combination of three types of slides. Easily visible from all sides and also a large influx of visitors can be dealt with quickly.

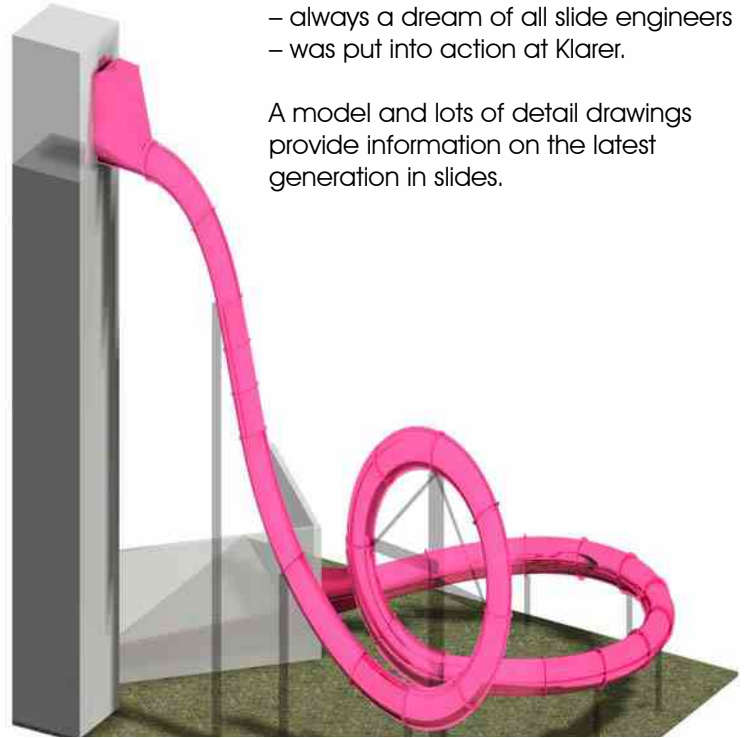

The slides and integrated stairs are made completely from plastic.

Loop-Slide

After a 4-year development period, 2 prototypes on a 1:1 scale and innumerable trial slides by brave employees, we can present the first functioning looping water slide.

A complete loop like a rollercoaster
– always a dream of all slide engineers
– was put into action at Klarer.

A model and lots of detail drawings
provide information on the latest
generation in slides.

A very special kind of adrenalin rush, and of course everything complies with all standards and safety concepts.
