Looping – fiction is now reality

After many years of development, since the middle of 2007, the first production-ready waterslide of this type has been stood in the Klarer Freizeitanlagen AG plant in Hallau in Switzerland to be marvelled at, touched and sampled.

Since 19.09.2008 the slide is open in **AquaMagis Plettenberg** and is already a big success. Among the lively support of numerous guests, radio and television, the first Looping waterslide by system klarer was initiated.

From a **13 m height**, you go free-fall up to 65 km/h into the loop. Slide head-over-heels, it has never been possible before. It takes a bit of courage but this experience is worth it all.

To loop the loop in a waterslide has become a reality.

WESTside – the architectural highlight of Switzerland

One of the largest shopping and leisure parks in Europe has been open since 08.10.2008.

Klarer Freizeitanlagen AG contributed the longest covered waterslide in Switzerland to the adventure world (more on Page 2).

Newsflashes

Magic Eye in the Sauerlandbad

Fun in the cool wetness is the top priority in the Sauerlandbad Bad Fredeburg. Soon, the pool will be even richer with additional attractions.

On the new slide tower, Klarer is building a **Magic Eye® tyre slide over 103 metres with daylight effects and a 51m long Turbo Slide**. Completion of the slides is scheduled for December 2008.

Locarno

In the beautiful Tessin countryside, you will hear the words "scivolare con Klarer" more frequently in the future.

Klarer Freizeitanlagen AG is building a **Tube Slide, a Turbo Slide and a SpaceBowl „Abyss“** for Centro Balneare Regionale di Locarno SA.

Panoramabad Georgsmarienhütte

"Aqua Power the last" was the name of the event on 26.04.2008 in the old panoramic pool. For the last time, the Niedersächsische Rutschenmeisterschaft (Lower Saxony sliding championships) took place in GMHütte. Now, it is being substantially modernised. Klarer is building the new **75m long Tube Slide** with safety landing pool and attractions.

Oldenburg

As an addition to an already extensive range of attractions, Olantis Huntebad Oldenburg receives an additional waterslide by Klarer.

This very year, the visitors to the pool will be able to enjoy the indulgence of a **Turbo Slide**.

Ottenhöfen

The community of Ottenhöfen is currently implementing an ambitious pool project with the construction of a natural pool – a growing trend.

Visitors will not have to be without the enjoyment of a waterslide. Klarer Freizeitanlagen AG is providing a **Rafting Slide** to fit in with the landscape.

The Madrisa in Klosters gets ready

Near Davos, the highest city in Europe (1560 m above sea level), you will find the typical mountain village Klosters, with beautiful chalets and the Madrisa adventure world.

This year, Klarer Freizeitanlagen was able to provide various figures from the fairy world for the skiing and hiking region. Soon, there will be other reasons to pay a visit to this exquisite region. Klarer Freizeitanlagen AG is building three different **dry slides** and a small ski-jump. An ideal addition to an enjoyment range that is already extensive.

Experience WESTside Bern Brünnen

A unique complex in terms of architecture, designed by famous architect **Daniel Libeskind**. Right angles and inclined building walls characterise the image of this outstanding place of well-being.

With its Robinia wood facades, Westside fits harmoniously into the surroundings, forming a successful connection to the beautiful old town of Bern.

In fitting with this – the superlative **"Bernaqua Erlebnisbad & Spa"**. 2000 m² water surface and 18 different pools invite the visitor to indulge and relax. Or to enjoy pure action on Klarer slides.

Klarer Freizeitanlagen AG contributed the longest covered waterslides in Switzerland to this adventure world. With a **174 m Magic Eye®, a 162 m power slide and the 157 m sensuality slide**, the most differing requirements of visitors are satisfied, supplemented by other products. The right thing for all ages and all demands.

Thought was also given to ensuring the largest-possible energy saving. All slides are equipped all-round with system klarer heat insulation.

Westside Brünnen, extraordinary in every sense.

Energy Requirements

With the increase in energy-related requirements, heat insulation for all closed-in external waterslides is becoming more and more important. The insulation developed by Klarer has proven itself in practice and is becoming increasingly popular. At the same time, planners and manufacturers are required to develop flexible concepts to install internal waterslides, and to make these space-saving and visually appealing. With their extensive range of different slides, knowledge and experienced motivated planners, Klarer Freizeitanlagen AG is really well equipped for this.

Knowledge by Klarer in demand worldwide

For a long time now, Klarer Freizeitanlagen AG has stood for innovation, quality and originality.

There is particularly strong interest in the versatility of ideas of the projects developed by Klarer.

Therefore, Klarer Freizeitanlagen AG is currently developing concepts for major projects in Russia, Belgium, the Netherlands, Luxemburg, Sweden, Poland, Italy, India, Morocco and Cuba.

The newly developed Looping waterslide by Klarer is enjoying long-lasting interest.

Ice Age in the Alpamare Pfäffikon

The IceXpress is off!

A glacier trip with lots of surprises is on offer to courageous visitors, in the 158 metre waterslide **designed by Klarer as an ice canal**. The wondrous visitor falls 17m into the deep, completes eleven sharp curves, of which three are steep-sloping hairpin bends and passes through a tunnel designed by Klarer.

Attention, there are icicles here too!

Kreuzlingen

Since 31.05.2008, after an 8-month construction phase, the Hörnli swimming pool has been sporting a face-lift. Improved access to the lake, the newly designed lounging area, adventure pool with water mushrooms, climbing net and sprinkler channel and the beautiful seating levels along the 50 m pool are just some of the details of the new "Hörnli".

Outstanding is the particularly successful combination of the two new waterslides. An 88 m open waterslide and a 47 m Super Slide provide the pool with its very own imprint. Especially the large Super Slide, not often found in this way, is a distinct attraction. Both complexes with safety landing basins by system klarer.

White Water River system klarer

With the renovation of the **Säntis Park leisure centre in Abtwil**, the largest combined shopping and leisure centre in Switzerland has been developed on 65,000m².

A special feature is the Canyon, unique to Switzerland until now, in the newly designed connecting structure between pool and shopping zone. This is a reproduction of a white-water river with curves, rapids, whirlpools and relaxation areas. The Canyon is integrated with architectural excellence into the basic fabric of the building, an example for operators of such centres. Huge fun for bathers and spectators with a length of 118 metres and a height difference of 4.62 metres.

Olympia Sport- und Kongresszentrum in Seefeld

leisure centre Säntis Park in Abtwil

With a capacity of 1,800 people per hour, the complex is up to meet the rush. A technical master performance. Developed, produced and completed in just 9 months, with continuous construction work. The ability of Klarer Freizeitanlagen AG was proven once again.

Other white water rivers have been successfully commissioned with system klarer this year in **Denmark's "LaLandia" holiday park in Roedby** with a length of 100m and in **Austria's "Olympia Sport- und Kongresszentrum" in Seefeld** with a length of 143m.

Triple Slide system klarer

The Triple Slide is enjoying long-lasting popularity.

Positionable in the tightest space, it can be integrated into any pool and onto camping sites and fits into any budget plan.

In particular, the younger visitors enjoy the additional range of playful sliding indulgence. The selection of three different slides provides long-lasting interest from the little ones and enjoyment for the accompanying grown-ups. The slides are well visible from all sides, making supervision stress-free.

Eventful Times for children

Among other places, these have been created in the Sportparadies Gelsenkirchen and in the Jumbo Park in Finland. In recent times, themed children's adventure worlds have been the focus of the development of water attractions for children. Additional variations have been added to the existing range of water games, figures and sculptures by Klarer Freizeitanlagen AG.

The large range of different figures and an autonomous play and spray technology now make a number of combinations possible for every operator, cost-effective new and further developments and a specific selection of subject for the children's adventure worlds, without having to develop everything from scratch. A considerable time and money factor for all customers.

New Homepage

Clear structure, clarity, an extension of the range, more technical details, more modern, fresher, these are the main features of the new Klarer Freizeitanlagen AG homepage.

This makes it even easier for all our customers and anyone interested in our services to find out extensive information about the versatile range and to find the right choice for them. Architects and engineers will also find their work made easier with the new homepage. Nothing is perfect. Klarer Freizeitanlagen AG is happy to receive your requests and suggestions.
